Create artist/add artist with these inputs				
Artist (778DABCD%_, Dheeraj, Melbourne Victoria Australia, 04-04-1980, Passionate vocalist captivating hearts with soulful melodies and powerful emotive performances., [Singer], [pop, jazz], [1999, Best Song of the year])	Artist (778DABCD%_, Dheeraj, Melbourne Victoria Australia, 04-04-1980, Passionate vocalist captivating hearts with soulful melodies and powerful emotive performances., [Singer], [pop, jazz], [2021, Best Musician of the year])	It should add award in the award list	It should add award in the award list	Pass

Part2: User Story and acceptance criteria based on Assignment 1 functional and non-functional requirements

User story: As a music listener, I want to be able to share my favorite songs to my friends across popular social media platform (Facebook, WhatsApp, Instagram), so that I can easily introduce them to the music I love.

Acceptance Criteria:

1. To access the SEF_Music app platform, the user must log in.
2. Upon selecting a song, a share icon should be visible, which, when clicked, will display a list of available social media platforms.
3. After clicking on a social media platform, the app should open it, enabling the user to choose a recipient. The message should already contain the song title and a link.
4. The user who initiated the song share should receive a notification from the SEF_Music app confirming the successful completion of the process, and the recipient should be notified through the chosen messaging platform.

User story: As a music creator, I want to be able to view a detailed graph about my monthly listeners, most played music and region wise popularity, so that I can keep a track of my music performance and make informed decisions about my content.

Acceptance Criteria:

1. A creator must login with their creator login credentials to access the dashboard.
2. Upon opening the visual dashboard, the data presented in the graphs and lists should be accurate and updated in real-time or at least with minimal delay.
3. The SEF_Music app should allow creators to export or download the reports.

User story: As a music listener, I want to be able to follow my favorite artist, so that I can stay updated and receive notifications about their latest music releases.

Acceptance Criteria:

1. When a user searches for an artist and arrives at the Artist profile page within the SEF_Music app, they should encounter a "Follow" or "Subscribe" button that permits them to start following the artist.
2. Following an artist should grant the listener the capability to customize their notification settings regarding music releases and tour updates.
3. The SEF_Music app must offer a straightforward method for users to unfollow an artist. This can be accomplished either from the Artist Profile page directly or through an "Unfollow" or "Unsubscribe" link included in notification messages.

User story: As a user, I expect a high level of confidence in the security and privacy of my data, so that my user credentials and payment information remain protected throughout transactions

Acceptance Criteria:

1. The developer is required to employ asymmetric encryption for creating secure communication links between the SEF_Music app and external servers.
2. The SEF_Music app team must guarantee that sensitive data, such as user credentials and card details, is never stored as plain text but is instead protected through the use of a robust hashing technique.
3. The SEF_Music app should also adhere to data privacy regulations and industry standards.

User Story: As a user, I want to be able to create and manage my playlist, so I can enjoy customized song collection according to my preference.

Acceptance Criteria:

1. To create and manage a playlist on SEF_Music app platform, the user must log in.
2. The home page should prominently feature an icon for playlist creation, where users can specify a name and description for their playlist.
3. Users are allowed to include songs in their playlist from either the playlist creation interface or directly from the song playback window.
4. User can adjust the order of songs within their playlists as desired.
